The Digital Upgrade & Brand Partnership

THE NEXT ERA OF PREMIUM DINING

Hamdy Shalaby is an undisputed leader in the Egyptian restaurant market. However, as RUN Agency drives premium traffic to the brand, the current digital destination—a static PDF menu—creates a slow customer experience. Forcing every hungry customer through the 17069 hotline also creates massive pressure during rush hours.

We propose a life-changing operational upgrade. By launching a high-end Digital Website equipped with a smart ordering cart, we will capture immediate sales, reduce call center bottlenecks, and turn your database into a smart revenue engine.

PHASE 1: THE PREMIUM DIGITAL MENU & SMART CART

THE PROBLEM:

Sending hungry customers to a Google Drive link stops them from ordering quickly. Furthermore, forcing them to wait on hold on 17069 during busy hours frustrates them and kills impulse sales.

THE SOLUTION:

We build a fast, interactive website with a built-in Smart Cart. It unlocks Google Search (SEO) and allows customers to order autonomously without tying up your phone lines.

REAL WORLD IMPACT:

Instead of a customer squinting at a blurry PDF on their phone and waiting on hold, they scroll through a mouth-watering digital menu. When they see the Mandi Lahm, they add it to their cart, enter their location, and checkout instantly via WhatsApp. Zero friction, instant sales, and zero pressure on your receptionists.

PHASE 2: WHATSAPP VIP MARKETING (REACHING PAST CUSTOMERS)

THE PROBLEM:

You have thousands of past customers, but social media algorithms hide your posts from them, and SMS messages look like spam.

THE SOLUTION:

We plug your customer list directly into our WhatsApp broadcast system to create instant sales.

REAL WORLD IMPACT:

You launch a special Ramadan Iftar menu. Instead of paying for ads and hoping people see your Facebook post, you send a beautiful WhatsApp message directly to 10,000 past customers. 9,000 of them open it within an hour, driving immediate, massive orders without spending a single pound on new ad traffic.

PHASE 3: AUTOMATED QUALITY CONTROL (THE 3-HOUR RULE)

THE PROBLEM:

Maintaining flawless food quality across multiple branches is hard. Unhappy customers often complain on public social media, while perfectly happy customers simply forget to leave a good review.

THE SOLUTION:

An automated quality control system built on human psychology to protect the brand and boost your Google Maps ranking.

REAL WORLD IMPACT:

Timing is everything. Exactly 3 hours after a smart-cart order is completed—when the customer is full, happy, and relaxed—they receive an automated WhatsApp message asking about their food. This perfect timing makes them much more likely to click the link and leave a glowing 5-star Google review. If they had a bad experience, the message catches them first, sending their complaint to a private manager dashboard to be fixed privately.

PHASE 4: CRYSTAL CLEAR AD TRACKING (FOR RUN AGENCY)

THE PROBLEM:

Right now, your agency runs high-end Meta ads, but because customers manually dial 17069, it is nearly impossible to track exactly which ads generated those offline phone calls.

THE SOLUTION:

Digital Action Tracking. We send clean conversion events back to Meta when users order via the cart or tap the call button.

REAL WORLD IMPACT:

RUN Agency spends 10,000 EGP on a new Instagram Ad. Before, you only saw 'Link Clicks' and guessed the ROI. Now, you see exactly how many people clicked the ad, viewed the website, and finalized an order in the Smart Cart. You know exactly what your marketing money is doing.

THE UPGRADE AT A GLANCE (CURRENT VS. CONFIRM IT)

BUSINESS AREA	WITHOUT US (CURRENT SETUP)	WITH CONFIRM IT (THE UPGRADE)
Menu Experience	Slow PDF links, zero SEO, high call center pressure.	Fast website with a Smart Cart for instant digital checkouts.
Marketing to Past Buyers	Posting on social media and hoping the algorithm shows it.	Direct WhatsApp messages to their phones with 90%+ open rates.
Brand Reputation	Hoping unhappy people don't post complaints online.	3-Hour delayed messages catching complaints & boosting 5-star Google reviews.
Ad Tracking & ROI	Blind spots. Can't track which ads make people call 17069.	100% clear tracking of every Smart Cart checkout and ad click.

INITIATION & STAGING

We do not just pitch ideas; we build working systems. We have prepared a live staging environment demonstrating the new Hamdy Shalaby website and Smart Cart ordering flow.

A full video walkthrough breaking down how it works will also be sent to your team.
